

HARMONY

ALLIANCE

Becoming a HARMONY Associated Member

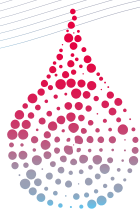

Co-operative working groups, hospitals and academic institutions are invited to collaborate and contribute data to the HARMONY Alliance.

About us

The HARMONY Alliance is a Public-Private Partnership for Big Data in Hematology including over 100 organizations such as European medical associations, hospitals, research institutes, patient organizations, pharmaceutical and IT companies. HARMONY uses Big Data analytics to accelerate the development of more effective treatments for blood cancer patients.

Various Research Project teams are already using the HARMONY Big Data Platform to answer critical research questions that cannot be addressed with other methods. We would like to encourage Co-operative working groups, hospitals and academic institutions to become an Associated Member and to contribute data to the HARMONY Big Data Platform. The more high-quality data can be collected, the sooner better tailored treatments to the needs of individual patients can be realized. Efforts for sharing data are compensated. Already over 100 public-private organizations from 17 European countries joined us. Read more at:

→ www.harmony-alliance.eu

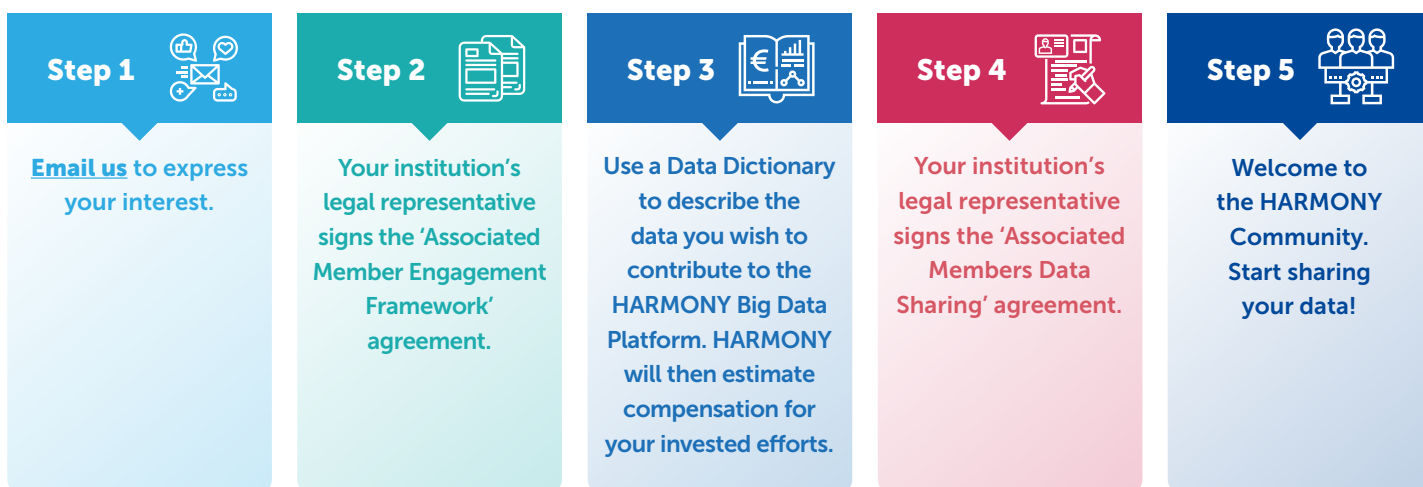

What can we offer you?

By becoming an Associated Member of the HARMONY Alliance, you can:

- Submit research proposals;
- Become a member of a dedicated research group that includes skilled data scientists;v
- Contribute to scientific publications under the umbrella of the HARMONY Alliance;
- Be compensated for your efforts in sharing your data;
- Contribute to improving outcomes for individuals with blood cancer.

How can you join?

Follow the steps below to join the HARMONY Alliance and become an Associated Member:
